🌐 <https://www.linkedin.com/in/sohaib-rafique-8218131b6> 👤 <https://sohaib---portfolio.vercel.app/>

I specialize in designing and implementing robust, scalable applications by integrating both front-end and back-end technologies with over 5 years of experience. With a strong foundation in building efficient user interfaces and modular components, I focus on creating seamless, responsive experiences that align with business goals and user needs. I collaborate closely with UI/UX designers and cross-functional teams to translate complex requirements into effective technical solutions.

Projects

1. Xpress - Decentralized Web3 Platform

🔗 <https://xyress.com/>

Xpress is a decentralized Web3 platform that bridges Web2 and Web3 with features such as blockchain exploration, secure digital wallets, password-less authentication, and AI-driven decentralization tools. It leverages a hybrid Bitpops consensus model to provide scalability, security, and fast transaction finality. The ecosystem is designed to make blockchain, AI, and metaverse adoption more accessible to mainstream users.

Stacks: Next.js (responsive, optimized UI/UX), Web3, Blockchain, AI-driven systems, Hybrid PBFT + Dapos, Scalable architecture, metaverse-ready foundation.

2. The Debt Box - Where Crypto Meets Commodities

🔗 <https://www.thedebtbox.com/>

The DEBT Box is a decentralized platform connecting cryptocurrency with commodity-backed assets through blockchain technology. It enables participation in resource-backed ecosystems while promoting sustainability and growth through innovative tokenomics. The platform features asset-backed tokens secured by real-world commodities, a digital mining model linked to sustainable resources, and full Web3 integration, ensuring transparent, secure operations designed for long-term stability and adoption.

Stacks: React.js, Next.js, Blockchain, Web3, Crypto Infrastructure, Responsive UI, Scalable Architecture

3. Bid Caribbean - Real-time Vehicle Auction Platform

 <https://lux-cars-production.vercel.app/>

Bid Caribbean is a full-stack vehicle auction platform built for users in the Bahamas and Turks and Caicos Islands, enabling real-time bidding on both imported and locally listed cars. The system integrates thousands of listings via a third-party API while also supporting secure local car listings after document verification. It features a dual auction system, fetching imported cars daily via third-party API and listing verified local cars for auction. Real-time bidding, powered by Pushers, takes place every Wednesday, supported by a bidding power system where users deposit funds to define their spending limits. Verified cars are auto-enrolled into live sessions, ensuring authenticity and smooth participation, while real-time communication delivers a fast and engaging auction experience.

Stacks: React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Context API, Pushers, and Custom logic with secure document handling.

4. RFID - Powered Inventory & Sales Management System

 <https://visusctrl.com/login>

A full-stack POS solution that leverages RFID for secure access, inventory tracking, and real-time sales reporting - built to optimize retail workflows. RFID-based authentication for staff access, Real-time inventory tracking. Role-based access (Admin, Staff, Super Admin). Sales tracking with timestamped reports, Instant transaction alerts, and logs. Scalable modular API architecture

Stacks: React.js, Tailwind, Node.js, Express.js, MongoDB (Mongoose), Authentication - JWT
RFID Hardware - Arduino-based modules, Deployment compatible.

5. Noshly - Platform for Independent Chefs

 <https://noshly.io/>

A modern platform empowering independent chefs to host pop-up dining experiences, connect with local communities, and grow their personal brands. Chef onboarding and portfolio profiles. Pop-up event listings and discovery. Community engagement tools. Responsive and performance-optimized UI.

Stacks: React.js + Next.js (SSR for SEO), Node.js (REST APIs), MongoDB / PostgreSQL, Scalable architecture, Awwwards-recognized design.

6. Haletale - White-Label Property Management SaaS

 <https://haletale.com/>

Tenant and lease management. Rent collection and integrated payments. Maintenance request tracking. Financial analytics and reporting. White-label rebranding and multi-tenant support.

Stacks: React.js + Next.js, Node.js (REST APIs), QuickBooks, Twilio, Docusoap, Scalable SaaS modules, responsive UI

7. Knect.ai - AI-Powered Learning Platform Visit Website Description

 <https://knect.ai/>

An adaptive AI-driven learning system featuring virtual tutors that deliver personalized guidance using retrieval-augmented and knowledge-augmented generation. Always-available AI tutors. Personalized learning pace and focus. Context-aware, accurate explanations. Real-time web-based interaction.

Stacks: Core AI - RAG, KAG, Large Language Models (LLMs), Data Layer - Vector databases for semantic retrieval, Platform - Web-based, real-time interaction

Experience

MERN Stack Developer

Vosyn · Full-time

Feb 2025 - Present

Ontario, Canada · Remote

- A remote company focused on developing web applications.
- Developed and maintained reusable and responsive UI components using React.JS, Next.js, and Tailwind CSS.
- Integrated dynamic API responses for secure authentication and session handling via NextAuth and JWT-based session storage.
- Implemented mobile-first layouts and adaptive navigation to ensure seamless user experiences across devices.
- Collaborated with backend developers to debug and resolve API integration issues and manage secure environment configurations.
- Followed best practices in version control using Git and GitHub, with structured, collaborative workflows.

Mern Stack and AI Developer

Devminds Studio · Full-time

Jul 2022 - Jan 2025 · 2 yrs 7 mos

California, United States · Remote

A software development company focused on creating innovative solutions.

- Integrate and develop new features while collaborating with the team to identify product and technical requirements.
- Focus on building efficient, reusable front-end modules and constructing complex UIs. Work closely with the design team to resolve challenging React, Next, Node, HTML and CSS issues.

Backend Developer

Itifaq AI · Full-time

Jan 2021 to Jun 2022 · 1 yr 6 mos

United Arab Emirates · Remote

- Built and maintained AI-driven web applications using cutting-edge technologies.
- Worked in a multicultural environment to deliver innovative solutions.
- Implemented scalable architecture and optimized application performance.
- Collaborated with international teams to meet diverse client requirements.

Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Python, Fast API, Web Sockets, Socket.IO, Modular architecture

Database: SQL, MongoDB, AWS S3

Authentication: JWT, RSA

DevOps: AWS, Vercel, CI/CD

APIs: Postman, Stripe

Education

Bachelor's in Computer Science

Comsats University Islamabad

Certifications

 [Namaste React](#)
